

CANADA TRADE STILL GROWING

(Brantford Examiner)

Reports from all parts of the Dominion afford the most convincing proof that Canada's outlook for the future is steadily becoming brighter. Remarkable progress was made in many directions in the year just closed. The exports of Canadian products were valued at \$378,000,000, in the available period of 1935, compared with \$358,000,000 for the corresponding months of 1934. This increase, while by no means spectacular, is considered satisfactory. Eight of the nine groups of the chief classifications showed gains. The shipment of animal products increased by 18 per cent. Textile exports showed a gain of 28.3 per cent. Substantial advances were also reported in wood and paper products, which reached the relatively high total of \$142,000,000. The iron and steel groups recorded an increase of 28.4 per cent. There was also a gain of 11 per cent. in the output of electric energy. In brief commercial and industrial activities throughout the entire Dominion revealed a gratifying expansion.

The general improvement resulted very largely from the easier trade relationships with other countries, both inside and outside the British Empire. One of the most conspicuous factors was the increased purchasing power shown by the agricultural industry as the result of higher prices and wider markets for its products. This manifested itself in all the channels of business throughout the country and even greater things are looked for in this direction in 1936. As an indication of the general prosperity, the value of the securities listed on the Toronto Stock Exchange increased during the past year by more than \$700,000,000. There was an increase of \$30,000,000 paid in dividends compared with 1934, making the total disbursements \$235,000,000. The value of mineral production throughout the Dominion aggregated about \$368,000,000, which constituted an all-time high level. Canada's progress is based very largely on the prosperity of its primary industries, including agriculture, forestry, mining and fisheries. If these maintain the expansion gained in 1935, with the increases that are anticipated in addition, the Dominion should enjoy the greatest volume of industry and trade experienced since the depression began. Much is expected from the Reciprocity Treaty with the United States which provides a wider outlet for many primary products, and also from the adjustment which are to be made in the special trade pacts. Canadians certainly have good reason for confidence and courage in 1936.

The Crop

Life is just a collection of garden plots—ribbons like running parallel in endless away—a strip to each individual.

As one sows so one shall reap is a statement too true to be questioned, too well proved by experience to be controverted. In accepting it there is one bit of the matter often overlooked in the rush and roar of things as they are. Many times it is forgotten that as one sows so others will to be contemporaries today, — descendants also on some still far off tomorrow.

Each allotted span of life may be looked upon as a garden space in which he who has it works or idles, the crop depending on the thought, time and care expended. Any given patch may be made a costly formal place, a waste where weeds riot, or become a great blossoming with fragrance that lingers long after the gardener has forever laid down his spade. He who tends well his plot has no need of words to perpetuate his memory.

At this season when man, looking over last year's output, is apt to be contented though unchanged, he might be wise to study his garden needs and plan a future. Animals make good showing. Blennies last a longer time. Like habits, perennials once established, will grow and flourish. But what matters are the vegetables—these things which live on when the tiller is no more.

Any neighborhood is enriched by a garden where smiles scattered widely by turn its flowers of happiness, and grandmothers' borders bloom with the blossoming of kindly little deeds grown into hardy plants. From such a spot one cannot tell how far the wind will carry the pollen and the perfume. Unkind is the power of the sower. From his plot may be blown a seed of good or evil—great enough to alter a world.—Ottawa Journal.

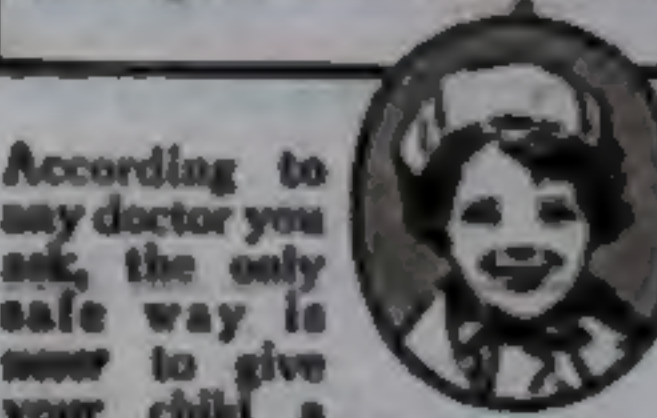

NEW IDEAS

Walls are painted to imitate wood—and you have to touch the wall before you'll believe it isn't wood—lamps are trimmed with crystal and temple glass is being used for mantels, fireplaces and all sorts of unusual things.

A unique games room is designed on the lines of the deck of an ocean liner. It's complete with locker, portholes, deckchairs, shuffleboard, quoits, darts, etc. And there's an adjoining bar all done in powder blue and navy.

A Law Every Mother Should Know and Observe

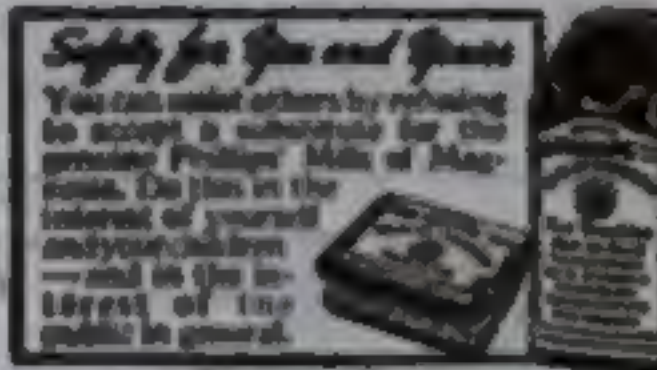

Never Give Your Child An Unknown Remedy Without Asking Your Doctor First

According to any doctor you ask, the only safe way is never to give your child a remedy you don't know all about, without asking him first.

When it comes to "milk of magnesia," that you know everywhere, for over 60 years, doctors have said "PHILLIPS' Milk of Magnesia for your child."

So—always say Phillips' when you buy. And, for your own peace of mind, see that your child gets this; the finest men know.

PHILLIPS' Milk of Magnesia

London Port Figures Show Improved Trade

London.—The tonnage of both exported and imported goods dealt with by the Port of London Authority during 1934-35 showed an increase over the figures for the previous 12 months.

The total imports, amounting to 22,096,921 tons, represented an advance of 7.4 per cent, and the exports—4,587,285 tons—an increase of 4.4 per cent. Shipping paying river duties of tonnage was up by 2.1 per cent, and shipping using the wet docks by 0.5 per cent.

The shipping entering the dry docks of the Authority during the twelve months was 2,133,349 tons gross, compared with 2,143,398 tons in the previous year.

Potatoes For Fitness

Although few people realize it, the potato is one of the most valuable vegetables in the working man's diet. The average housewife, however, uses it largely because of its cheapness.

It is rich in vitamins A, B and C, and is also an excellent antiscorbutic. In fact, scurvy is unknown in countries where potatoes form a regular part of the diet. Most people imagine that they are fattening, but Dr. H. K. Archibald, who has done a considerable amount of research work on the potato, says it may be included in any diet without the slightest qualms. It is very nutritious, and with the addition of a little butter and salt men have lived exclusively on a diet of potatoes for 300 days, keeping in perfect health the whole time.

Safety First

Farmer (to new hand from the city).—Now, when you are attending to those mules, I warn you not to approach them from the rear without speaking to them first.

New Hand.—Why is that? Is it a question of etiquette on the farm?

Farmer.—No, it isn't a matter of etiquette at all. But one of them mules is liable most any time to kick you-off in the head, and I don't want a lot of lame mules on my hands.

Foreman.—See here, Buddy, that other fellow is carrying two sticks of timber when you're carrying only one. What have you got to say?

Buddy.—That fellow's too long to go twice.

MINTO TODAY AND TOMORROW

(By Prof. S. B. McCreedy)

"Editor's Note: This is the second of a series of 10 articles which were published recently in the Harrison 'Review'. While written specially for the 'Review' and addressed to residents of Minto Township particularly, we believe they will be found interesting to many of the readers of this paper because the problems of the farm folk of Minto Township are the same problems that confront rural people throughout the Province."

A few weeks ago there passed away in the person of Thomas Madison, the first white child born in Minto Township. He was 83 years old, which means that his parents likely came in about the year 1851 from the Owen Sound road entrance before the township was surveyed.

The township was surveyed by Charles Haskin of Owen Sound in 1853 and in 1854 there was a public sale of the land. But settlers had come in before this. Wm. Reynolds and Geo. Lyons came in in 1851 and probably the Madisons preceded them. The Harrisons, Wilkins, Ferris and the Lees came in 1853; the Brices in 1854 and John Livingstone and Wm. Lemon in 1855.

So Minto is getting on in years. What hosts of people have come and gone from its farms? What a history could be written of every one of these farms? The clearing; the log shanty and barn; the road-making; the logging boom; the births and marriages and deaths; the first school and the early teachers; the new house and the barn raising; the emigration to the West and all the triumphs and failures, all the joys and sorrows that mortals experience in this queer world.

I have often wished that all these histories might be suitably recorded before it is too late; and eventually preserved in the Public Library. It would be a very well worth while work for the schools of the Township and the History Department of the High School. Some of the township women's institutes have done commendable work in this connection. It is to be hoped all such work is kept in well bound Scrap Books so that it may be available for the children's children of Minto pioneers.

But it is Minto as it is today that I want to set forth here. Not so much about its people as about its lands and its Agriculture development. I am quoting the figures as they are given to the Census and Statistics reports prepared by the Government.

According to the map, Minto has an area of 115 square miles. If it were not that Minto Township cuts out its north-east corner, it would be a rectangle 10 5/8 x 11 1/2 miles. Harrison is in the very centre of the township.

The population of the Township in 1931 was 2904 and of these 1230 were over 21 years of age in 1934 and entitled to vote in Provincial elections. There are 17 one-teacher schools in the township attended probably by one-fifth of the population, namely 400 children.

According to the 1931 census, there were 587 farms in the township with an average of four persons living on each. 450 of the farms (85%) are worked by their owners. Only 67 farms are operated by tenants. 258 of the farms (44%) range in size between 51 and 100 acres, 196 of the farms (34%) range between 101 and 200 acres, 31 farms range between 201 and 300 acres, 11 farms are over 300 acres.

There are relatively few small farms in Minto. There are 16 ranging between 1 and 4 acres; 14 between 5 and 10 acres and 59 between 11 and 50 acres. No 55% of the farms are larger than 51 acres.

SOME MINTO STATISTICS

The 1931 Census reveals the following interesting facts:—The total value of the stock was \$443,970 but this was a depression price. There were 2963 horses, 9953 cattle, 3770 sheep, 6,064 swine and 64,717 poultry. 14,711 lbs. of wool were sold. The eggs sold were valued at \$41,015. The total sales of domestic animals and poultry sold alive in 1931 was \$221,257. The total income for

wood, crops and animals, not counting private sales, was \$361,054.

Figures are not given for other sales from the farms, including milk, fruit, wood, grains, seeds, hay, potatoes, turnips. So one can only guess what the total income of the 587 Minto farms would be in 1935. Even at the depressed prices prevailing, I heard a calculation at \$1,000,000. There were 26,554 acres in crops, including 1930 acres in wheat, 1585 acres in barley, 10,747 in oats, 7741 in mixed grains, 12,773 in hay, clover and alfalfa, 491 acres in corn, 325 in turnips and 126 acres in mangels and sugar beets. 5,946 acres are woodland and 13,194 acres stated to be "unimproved."

The total assessment for Minto in 1933 was \$2,418,434, including \$1,750,979 for the land and \$667,455 for buildings. The taxes raised totaled \$12,553 including \$11,700 for schools and \$853 for municipal expenses. The total receipts for 1933 was \$54,537 and the total expenditure \$47,645. These figures include debt-service payments, etc.

So the 587 farmers of Minto are in big business! They operate a 2 1/2 million dollar plant; have an annual income of \$1,000,000 (?) with a net annual loss (?) or gain (?) of how much? Who knows? If Minto farmers are in similar plight to farmers in other parts of Ontario, as reported to me in my journeyings, then 587 or more are very hard up and looking anxiously for a way out of their difficulties.

What is the Minto of tomorrow to be? I wonder what change the next thirty-five years will show. By co-operation and improved methods doubtless there may be great advancement. For such a forward movement, in my opinion there must be a forward step in education. In my article next week, I shall tell why I want to Denmark.

Skilled Trades Now Offer Good Openings For Young People

Opportunities for young people who contemplate careers in skilled craftsman are excellent, according to Walter B. Pitkin, author of "New Careers for Youth."

"Industry wants to know," he says in the National Magazine, "where tomorrow's skilled craftsmen are coming from. Finding few, employers are beginning to open up apprentice training courses to help meet the most acute shortage of skilled labor this country has ever known."

"In Detroit, the mechanical industries need 300 highly skilled workers each year, merely to replace those who drop out because of sickness, accidents, death, promotion, transfer, and old age. This makes no allowance for the growth of industries, nor for the birth of new ones."

"Employers in other industrial parts of the country are today faced with similar skilled labor shortages. Forethought in installing new machines and methods to cut costs in hard times, employers have been extraordinarily short-sighted in training and retaining workers to utilize these."

"In America's metal industries alone," Dr. Pitkin continues, "at least 10,000 skilled workers are urgently wanted in plants operating today at far less than capacity. As business improves, production will step up proportionately. If it approaches the levels of the Twenties, there will be a shortage of 125,000 skilled workers in the metal industries."

"While not quite so acute elsewhere, the shortage still plagues other industries. We know 2 important facts: (1) Skilled workers are wanted in all fields where new machines and methods have improved beyond the capabilities of the older workers; and (2) In American factories other than those in the metal fields, at least 6,000 new skilled artisans must be found each year to replace those dropping out. If the plants are to operate about as they did in 1929, there must be a single skilled worker in the clothing industries, the publishing business, breweries and distilleries, railroads, and marine shipping. Now does it include such other industries as retailing and agriculture?"

"Openings will probably be most numerous in Connecticut, Massachusetts, New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Michigan and Wisconsin. But there still be thousands of jobs elsewhere, even in small towns and villages, many of which have already reported acute shortages."

The King at Rest

Rest, Majesty, in peace so truly earned.
In fondest memory, O beloved King,
Thy kindly, genial smile is ours to guard,
Endearing hearts o'er all thy vast domain.

Thy voice, listened with cordial words sincere,
We cherish now in seeping hearts and minds.
Thy peaceful hopes, thy kindly, kindly mien
Leave precious thoughts within the hearts of all.
E. CLINTON MARTIN
Ottawa, Canada.

KEEP SMILING!

There's never a load too heavy to bear, nor a road too steep to climb; There's a friend who can't be troubled by gloomy shades. And He is not hard to find.

We often find Him in dens of sin, in seamy lanes in a baby's smile; He seeks lowly places souls to win. We must help Him all the while.

We can aid Him by lending a helping hand to a traveler on his way; By speaking kind words to a down-hearted man in the mud and it will surely pay.
Words cost but little — a smile is worth while, small effort — our part is spent;
Yet it may brighten the day for a little child through the message God has sent.
Let's just do our best from day to day, help a weak brother — be the smile and be cheerful 'til "over the way," we reach the end of the last weary mile.

Blowfish.—You went after that job, did you? I thought you believed that the office should seek the man.
Kinswater.—I do. But this is an extra fat job and I was afraid it might get out of wind before it reached me.

PEPPER and SALT.—The fees in the School of Experience are always paid in advance. . . . A man's best friend should be himself, but one friend isn't enough. . . . In too many families most of the sheep are black. . . . Whatever because of the share-the-wealth? . . . No one is rich enough to do without a neighbor. . . . The average crowd in most homes has no room for skeletons. . . . You can't feel all the people all the time, but somebody is trying it all the time. . . . With all its drawbacks life is still a splendid adventure. . . . Advertising is what draws away the trade from the small village. Advertising will also keep it at home. . . . Of course, smoking hurts a woman. It robs her of a complexion when her husband kicks about extravagantly. . . . Women always enjoy a world crisis most because it is man-made. . . . What's left after you've paid your bills is known as a headache. . . . When reason fails, use your nerves. . . . Few "good times" are worth the loss of four hours sleep. . . . In three days a good story is an old story. . . . Is anything worse than a vase of dusty artificial roses? . . . For good work good tools are as necessary as good workmen.

Correct this sentence: "I can pick out the educated people," said the police officer, "for they don't look to clear a traffic jam."
"What is your age?" asked the magistrate.
"Twenty-one years and some months," replied the woman witness.
"Just how many months? You know you are on your oath?"
"A hundred and twenty."

Neighbor.—Your husband looks like a brilliant man. I suppose he knows everything?
Friend.—Don't feel yourself. He doesn't even support anything.

Wife.—I think you ought to talk to me while I live.
Hubby.—Let's change it around and you sew to me while I read.

Two big moments in a young man's life:
The first time he wears a dress suit.
The first time he dictates a letter.

Some Americans on board a liner were talking to an Irishman, and, deciding to pull his leg, told him that once when the vessel was a thousand miles from land a man died overboard and got . . .

"Did any of ye know the man?" asked the Irishman.
Nobody did.
"Did any of ye ever see the man?" Nobody there had ever seen him.
"Well," said the Irishman, "I'm the man."

A miniature Scout and Cub Jamboree in the assembly hall of the High School was the first given in annual Parents' Night of the Whiffy Scouts and Cubs. During the evening P. L. Graham MacDougall received the Canadian Legion Medal for his essay "What Canada Can Do to Help World Peace". The medal was presented by Rev. E. R. Adge on behalf of the Provincial Command of the Legion.

The annual Holiday Fair of the 2nd Hamilton Scout Trip and Cub Pack was held in connection with the Hamilton-Wentworth Pet Stock and Poultry Show.

A series of twenty questions given local Scouts in a test for their Fireman's Badge was published in the Sidney, B.C., "Review", and attracted considerable attention, and this editorial comment: "One of the papers was read at the 'Review' office, and showed very clearly that the boys who passed had taken a keen interest in the subject. These questions were very intelligently answered in the majority of papers, and the knowledge obtained should be a lasting benefit to the boys throughout life."

Reports from such widely separated points as Midland, Ont., and Weta-shiwin, Alta., indicate the Dominion-wide extent of the service Boy Scouts are giving in relief work. At approximately the same time the Ontario Scouts were making a house-to-house canvass for clothing on behalf of the Red Cross, and the Alberta boys in co-operation with the local Welfare League.

The West Looks Up

(Winnipeg Tribune)

The wheat is moving out. The farmers are provided for in the minimum price. The world is taking our wheat in increasing quantities. Winnipeg, very keenly concerned, has reason to feel happy over the situation.

The drought is definitely broken. Real, the scourge of the wheat crops last year, seldom afflicts much damage in the succeeding year. The west with reasonable optimism can look forward to normal crops and somewhat higher prices. No part of Canada—few parts of the world—have suffered greater losses than the prairie country in the last five years. It is a satisfaction to see it feel firmly planted in the comeback trail.

Mining is good. Manitoba's mines are contributing far more substantially to the growing prosperity of this city and province than was considered possible even three years ago. Great opportunities still exist in this field.

All in all, it is a brave new start—and it is not merely something we can see ahead of us, but something we are experiencing. Our difficulties and our handicaps are still many, but we are clearly heading into a period of greater material prosperity which, as it develops, will solve many of the humanitarian and other problems with which we have been so greatly concerned in the last few years.

Man Is Given Eye To See In Dark

ST. LOUIS—Science now gives man an eye to see in the dark—a foot-long vacuum tube on which the invisible infra-red and ultra-violet rays that fill the air form a visible, living, moving, continuous image.

The new tube was shown for the first time at a general meeting of the American Association for the Advancement of Science by its discoverer and inventor, Dr. N. E. Everett and Dr. George Morion, of the Radio Corporation of America laboratories.

They have realized one of man's oldest and apparently most impossible dreams. Finally they have taken beams of electrons and focused them just as the lens of the human eye

Growing Deaf with Head Noises? Try This.

If you are growing hard of hearing, and fear catarrhal deafness, or if you have roaring, rumbling, hissing noises in your ears, go to your druggist and get 1 oz. of Parmitin (double strength) and add to it 1/2 pint of hot water and a little sugar. Take 1 tablespoonful four times a day.

Clogged nostrils, inflamed throat, and the mucous stop dropping into the throat. It is easy to take. Anyone who is threatened with catarrhal deafness or who has head noises should give this prescription a trial.

Scout rings were presented to P. L.'s Craft and Taid Scout Hagan of the 2nd The Fox Troop, Man, in recognition of perfect attendance records since the first meeting of the troop in September, 1935.

Celebration at Trafalgar House of the first anniversary of Ottawa's Legion Scout Troop was distinguished by an unusual involution. This was the taking of the Scout Promise, as Scouts of the Group, by Col. G. R. Fawcett, V.C., D.R.O., M.C., and Major M. F. Gregg, V.C., M.C.

"In your hands Canada will be safe," said Ven. Archbishop John L. Almond, addressing the Trinity Memorial Scouts in Montreal, at their third Father and Son banquet. "Often when a man builds a home and creates an estate his son destroys his work. This is indeed discouraging, but the adults of this generation who have done our part toward building Canada, it is a happy thought that when we are gone, you boys, the coming generation, will take care of and further our Dominion. I love Canada; and I know she is safe in your hands."

For the making of an artificial indoor council fire each Scout of the McIntyre School Troop of Winnipeg, cut a log and burned or carved his name on it.

The readiness of the local Library Board to place a number of books relating to Scout work in the Wallaceburg Public Library was duly reported at a meeting of the local Scout Association.

Focus light. Like light, electrons carry optical images.

Thus, inasmuch as the eye cannot see even focussed electrons, the two scientists have made a mechanical retina which sees the electron images exactly as the retina of the eye sees images in light.

Winter Storm

Driving snow before the wind. Over the tree-tops, gust and bare, sweeping down to the drifting roads. Turning in swirls through the air.

Blur of lamps in a mist of white. Trackless paths with pinpoints of mud.

Rising dimly all the night. Striking against the window-pane. Laden gusts swirl and fly; Now and again in the chimney-due Note of a crouching lullaby.

—Ermina Carpenter Holland.

Historical Remains of Grimsby Township

By Myrtle A. Dean
PART I
1888 - 1874
Installation 18

A warm summer breeze came up and the noon day sun scintillated through the lofty trees down onto the newly arrived worshippers in the Circle while all around lay the deep forest; quiet, tranquil, great trunks rising thickly to the sky. Finding good seats well up near the front, Mrs. O'Neill, her face beaming, remarked, "There must be all of five hundred people here."

"I should think so, too," said Mrs. Morton looking around. "By Saturday we'll be having a wonderful camp meeting, the weather is so fine."

On the platform the speakers and leaders who had arrived began to take their places. When some semblance of order was established the Rev. Michael Farwell of Grimsby, big and burly, got up to begin the service. An expectant hush fell on the assembly. He welcomed them warmly in his rich, brogue and opened the meeting with the announcement of a stirring old Methodist hymn. There was no hesitation. They stood eagerly, someone started the note and every one joined in with vigor and ardor.

"Come Thou Fount of Every Blessing."

"Tune my heart to sing Thy grace. Streams of Mercy never ceasing. Call for songs of loudest praise."

Another song immediately followed, for people were coming in steadily although no one heeded the disturbance. The voices rang out again.

The Women's Institute

will sponsor a meeting on Canadian Industries to be addressed by Mrs. R. W. Witherspoon, B.A., of Russell T. Kelley, Limited, Hamilton, on

TUESDAY, FEBRUARY 4th at 2:15 in hall.

MARONIC HALL, Grimsby

This meeting should be of interest to all women in Grimsby and the surrounding district. There is no admission charge and lucky number door prizes exceeding \$10.00 will be given. Mrs. George Bolton will be the reader. Invitations in Grimsby and Fenton are invited.

"Come to the Saviour, make no delay. Here to our hearts He's shown the way."

"Sing, good people, be joyful," the preacher called waving his arm. A double volume of song echoed through the forest.

"Joyful, joyful will the meeting be. When from sin our hearts are pure and free."

The great camp meeting proper had begun. Prayers of supplication were raised to invoke the descent of the spiritual power while special attention was given at the outset to quicken the faith and zeal of those already converted to draw out their sympathy for the unconverted, many of whom were still to come.

The Rev. John Wakefield preached the first sermon. His clear ringing voice with its rapid utterance and his searching charges, at once commanded attention. He was zealous, outspoken and fearless, yet his manner was gentle and persuasive. The peace-maker he was called, loved and revered. He chose his text from I Kings 19th Chap. 4th verse. "There is a sound of abundance of rain."

After the service, prayer meetings were held. Mrs. Nash, emotional and enthusiastic, was the first to gather a group around her and started singing themselves into the spirit over near the preacher's stand. In different sections people were forming while late arrivals went back to their tents to finish getting settled.

Mrs. Morton though, with Janet and Homer and little Anabel, made her way across to the Topleys. An idea had formed in her mind. "Little John's mother died of the diphtheria the same as our Joves," she explained to them on her way over. "I want you to be very nice to him!"

John Wakefield was beside them as they came up. "You didn't know Johnny in my sermon," he said affectionately putting his arm around the serious-eyed lad of eight standing beside his father.

"Well no, I didn't know you knew each other," she said kindly. "You see it was only last year we met at Smithville but we got so well acquainted there."

"I well remember you and your husband, Mrs. Morton, and how to see you here." Rev. Daniel Topley shook hands all around even remembering Anabel. He was a little over the average in height with handsome, masculine features; shaven except for the narrow bushy circle of well-trimmed black whiskers beneath his chin which revealed a good natured mouth with humorous turn at the corners, just now saddened from his recent bereavement. But to the boy the mother had been as his whole existence and now he was dependent on his father who was helplessly endeavoring to make up to his son in some measure at least what he had lost.

Mrs. Morton's whole being vibrated sympathy. "Why not let John stay

with Homer and Janet for a while, Mr. Topley? It will do him good," she suggested in a motherly tone.

"The harassed man, relieved in spite of himself, thanked her and looked at his boy. A bright smile momentarily wreathed his childlike face as Homer beckoned him.

"We were to stay with the Fairbairns," said his father, "but the boy can do as he wishes." Little John went eagerly. "I think I'll go with Homer, he's my age, father," he said old-fashionedly, looking up at him to see if he'd mind.

Mrs. Morton patted his cheek. "Janet, I will put you in charge of the two boys. You can go back to the tent while we're at prayer meeting and we'll have each have a nice big peach from the tent, you know where it is?" she whispered aside. Janet nodded.

"No no," said Anabel, interested in the prospect of a peach, but not at all in the idea of leaving her mother. "I don't want to leave you. You'll be lonely."

The afternoon sped quickly by and loads of Methodist people, young and old, began to arrive from Grimsby village with their baskets for supper. Now the dew was on the grass. There were the Marsh's and the Moores, the Kitchens, Smiths and others while from the mountains came James Ross with his family, the Bensons, Bowers, VanDusen and many not mentioned but sympathetic to the cause.

Joe Carver began humming his fingers as soon as he arrived and gravitated immediately over to the O'Neil tent. The minute he saw Carrie who was with a number of new acquaintances his pulse quickened. "She's more beautiful every time I see her," he thought.

Walking over to them he politely said, "I'm getting my fingers together for tonight and hope you'll join me." There was something compelling in his manner, with a confident look in his intelligent eyes ever ready to smile.

Carrie introduced her new friends. "This is Miss Comfort. Mary Campbell here tells me Martha has a lovely soprano voice, Mr. Carver."

He gladly included them. "We will sit together on the far side over there close to the platform." Then turning himself he quickly made his way over to the group of young men on the other side of Morton's tent where he ran into George.

"How are you, George? I've often seen you in the band with your drum but we never seemed to meet." He looked at him with keen interest and George, in spite of himself, liked him. "I didn't know you were a Morton till Carrie told me. We should have the band here." Then he laughed.

George shook his head. "No, I don't think we could very well play here. I can't imagine it. I think the preacher would vehemently object."

"I guess they would. I'd like to think. You were never out to singing school, were you? You have a good speaking voice. How try?"

"Well no, with my head practice, I can't manage too many things."

"You better sit with the singers. Some one told me you were going to Victoria. I wish I had a chance like that," he said as he hurried away. (To be continued)

LIVED DURING REIGN OF FIVE MONARCHS

There is probably only one person in this district who has lived during the reign of five British sovereigns. She is Mrs. David Ogden, of Chatham, who will observe her 85th birthday in February. She was born in 1851, during the reign of William IV. During the same year Queen Victoria ascended the throne, to be followed at later dates by Edward VII, George V and Edward VIII.

SUNDAY'S 75c DINNER

Fill a plate to the full tomorrow—and a dinner such as only Louis himself can prepare. It will be a most delightful occasion—well worth while.

Louis' RESTAURANT

Air Conditioned the Year 'Round 103-105-107 FALLS STREET, NIAGARA FALLS, N.Y.

Social and Personal

A few friends of Miss Marion Parsons surprised her at her home on the occasion of her 34th birthday a few days ago when a pleasant few hours was spent.

Mrs. W. R. Bait of Brandon is the guest of Mrs. C. E. Eyer, Nelson Rd.

Mrs. George Mould, Park Road, has returned after visiting her daughter, Mrs. Norman Johnson at Barrie. She was accompanied back by Mr. and Mrs. Johnson.

Mrs. Frank Hitchman has been spending the past two weeks with relatives at Boston, Mass.

Mr. and Mrs. Harold Headly and Miss Phyllis Morton spent a few days with Mr. and Mrs. Harry Marsh, Toronto.

YEARLY MEETING TRINITY UNITED

(Continued from page 1)

Churchmen who read a passage of scripture and offered prayer after which the business of the meeting was proceeded with.

Reports, all of which were of an encouraging nature, were presented from The Sunday School, The Women's Association, The Young Women's Auxiliary, The Young Men's Union, The Young People's Union, The Choir, The Mission Band, The C. G. I. T., The Tule Boys and Trail Riders, The Hamilton Club, and The Young Club.

The Treasurer's report indicated that the budget had been balanced for the year, in connection with which tribute was paid to the various organizations, particular reference being made to the Report of Stewards of which Mr. T. R. Hunter, has been the capable chairman. A large amount was raised for all purposes including substantial contributions to the missionary and benevolent funds, the various organizations reporting credit balances.

In reviewing the activities of the church, Rev. Mr. Earchman highly complimented the various departments of the church on the fine results achieved and emphasized that the congregation should seek to keep ever before them the spiritualities of their work.

The report of the Session indicated that the total resident membership had advanced to 982.

Contributions to the program which added much to the evening's enjoyment, comprised vocal solos by Mrs. W. R. Bain, soloist of Victoria Ave. United Church, Brandon, Man., a duet by Messrs Jack Ansell and Harold Jarvis, a vocal solo by Miss Carrie Durham and readings by J. D. Ross and G. L. Eaton.

Recognition of the splendid service given by the minister, Rev. E. A. Earchman and Mrs. Earchman, was voiced in an appreciative resolution which was heartily endorsed by the meeting.

A resolution appreciative of the supper which was served by the men of the church was also heartily approved as was a resolution expressing the church's appreciation to Mr. Boyer of the Lincoln Floral Company for his generous donations of flowers to the church from time to time.

Miss Elsie Drury was re-elected treasurer and envelope secretary while Mr. E. J. Muir and Mr. A. V. Cotton were elected auditors.

Messrs. C. F. Brown, T. R. Hunter and W. McEwen were added to the Trustee Board while Messrs. A. E. Merrill, Vernon Tuck, L. A. Wrenley, and James Baker were elected to the Board of Stewards for a period of three years and A. Chagley, for a period of one year.

The evening concluded with the benediction by the minister and the singing of the National Anthem.

BAPTIST CHURCH ANNUAL MEETING

(Continued from page 1)

Church Leader - J. A. C. C. Organist - Miss O. Grimsby. Asst. Organist - Mrs. G. Housh. Organ Committee - J. A. C. C. A. F. Norton.

Treasurer Committee Offering - G. Housh. Flower Committee - Mrs. W. L. Pettit, Mrs. A. Dwyer, Mrs. G. Eyer, Mrs. F. J. Oakes.

Auditors - Mrs. C. Leung, Mrs. L. Boushous.

HAS TAKEN OATH

Miss Honor Judge J. E. Campbell has taken the oath of allegiance to King Edward VIII. All other county officials have been notified to appear and take the oath of allegiance. The oath is administered by Crown Attorney E. H. Lancaster as Clerk of the Peace.

- IN MEMORIAM -

In loving memory of W. G. Parsons, who passed away Saturday, February 1935. You sang before you died "For you I am Praying." We would like someday to meet you standing by our Saviour's side. Sadly missed by wife and children. Mrs. W. G. Parsons and Family.

OBITUARY

Mrs. Charles Cole

Following a brief illness, Mrs. Elizabeth Sophia Durham Cole, widow of Charles Cole, formerly of Grimsby and aunt of Charles and William Durham of Grimsby Beach, died at the home of her son-in-law, Ford Moore, 1457 Main street, east, Hamilton, on Monday. The deceased was born in Grimsby 53 years ago, and for the past 45 years had resided in Hamilton. She was an adherent to Trinity Baptist church. She is survived by a son, Arthur T., of Hamilton, and daughter, Mrs. Fred Moore, with whom she resided; also two grand-children and three great grand-children. The funeral will take place on Thursday afternoon at 2:30 o'clock from the funeral chapel, of J. H. Robinson and company, limited, to Hamilton cemetery.

Mrs. Cole was the last surviving member of the family of the late Conrad Durham, a former resident of Grimsby.

J. E. LAWSON HONORED WITH COUNTY WARDENSHIP

(Continued from page 1)

that the work of the county council is different from that of their own municipalities and that as members of the county council their minds must be broadened out in order that they serve the county as a whole and not overlook the interests of the municipalities their fellow members represent.

"You may rest assured that I will give the county in service and attention to duty all that I possess."

A veteran member of the county council where he this year enters upon his tenth year of service, Mr. Lawson has occupied all the important chairmanships of the county council including that of Finance, Roads, Pensions and Roads and Bridges, and is therefore particularly well qualified by reason of long experience and thorough acquaintance with the work of that body, to occupy the responsible position of wardship to which he has been appointed. Assiduous in attention to his duties and untiring in his efforts to promote the highest interests of the county, the honor which has come to him is a well deserved one and his fellow citizens in this community as well as throughout the district will heartily congratulate and felicitate him on his election as warden of the county of Lincoln for the year 1936.

Standing Committee for 1936 Finance - S. Stirling and the whole Council. Roads - J. Lampman, Harrison, Groff. Education - W. Nestitt and the whole Council. Printing & Building - L. E. Claus, F. Butler, W. H. Harrison, W. Nickerson. Industrial Home - P. Graham, R. Dawson. Agriculture - W. H. Harrison, H. Fawell, A. Culp, P. Graham, R. Dawson, S. Young, A. Croft, E. Mack. Assessment - H. G. Mogg and the whole Council. Legislation - H. Fawell and the whole Council. Children's Shelter - W. Nestitt. Reception - H. Dawson, R. Kennedy, D. Mackwood, E. Mack, W. Nickerson, P. Graham. First name to be chairman.

LEGISLATURE MEETS FEB. 11

Acting Premier Harry Nixon has announced the second session of the 15th Ontario legislature will open Tuesday Feb. 11.

The session was scheduled to open Tuesday but was postponed Monday night when King George died.

The Lieutenant-Governor will read the speech from the throne when the legislature convenes, but there will be no formalities usually attending the opening.

It is likely the provincial income tax bill will be introduced on opening day.

YEARS IN HAMILTON ROBBERY

After he had pleaded, through counsel, for him in partial punishment for his part in the armed robbery of the grocery store of Nick and John Laycock, Beach road, William Perry, 22 years of 164 Roselynn avenue sth, was sentenced to four years in the penitentiary by Magistrate H. A. Burbridge Saturday.

Oldest European Discovery Against Stomach Troubles and Rheumatism Acclaimed Best by Latest Tests

Since 1700 thousands of people have regained their normal health after years of suffering from stomach troubles of all types, such as constipation, indigestion, gas, and sour stomach which are the basic factors of such maladies as high blood pressure, rheumatism, periodic headache, pimples on face and body, pains in the back, liver, kidney and bladder disorder, exhaustion, loss of sleep and appetite. These sufferers have not used any man-made injurious chemicals or drugs of any kind; they have only used a remedy made by Nature. This marvelous product grows on the highest mountain peaks, where it absorbs all the healing elements and vitamins from the sun to aid HUMANITY in distress.

It is composed of 19 kinds of natural leaves, roots, berries and flowers scientifically and proportionately mixed and is known as LION CROSS HERB TEA.

LION CROSS HERB TEA tastes delicious, acts wonderfully upon your system, and is safe even for children. Prepare it fresh like any ordinary tea and drink a glassful once a day, hot or cold.

A one dollar treatment should be given to you and feel like a new man. Lion Cross Herb Tea is the only remedy in the world that is so simple and so effective. If not satisfactory money refunded to you in full.

Try it and convince yourself with our money-back guarantee.

1 week treatment \$1.00 4 weeks treatment \$5.00

In order to avoid mistakes in getting the genuine LION CROSS HERB TEA, please fill out the attached coupon.

Apples Moving Freely Potato Prices Steady

The weekly and Market Reports of the Fruit Branch, Dept. of Agriculture, Ottawa, under date of January 24, has the following crop news relating to this district:

Niagara District: Weather - Varying from mild to quite cold with high winds and snow causing some traffic interruption. Apples - Moving freely from eastern area, cold storage. H. H. Tomato crop practically finished and houses preparing for spring crop. Potato prices steady with sufficient supply Ontario and Prince Edward Island stock to meet demand. Celery demand improving slightly but at lower prices. Local market now expected eventually to absorb all Niagara District and Hamilton supply if no receipts from outside. Carrots and Parsnips plentiful but demand very slow. Beets and Cabbage scarce.

Burlington District: Weather - Fairly cold with light snow. Apples - Steady local demand. One car Shores shipped to Montreal. Other Fruit - H. H. Tomatoes practically finished. Potatoes - No change from previous week to report. Turnips - Truck movement through city of Hamilton to U.S.A. nearby cities continues active. Celery - Cold storage keeping well with exception of small lots which were affected with blight and a few lots of fully matured stock showing some waste. Mushrooms - Increased local supplies, prices easier.

ICE JAM AT FORT ERIE

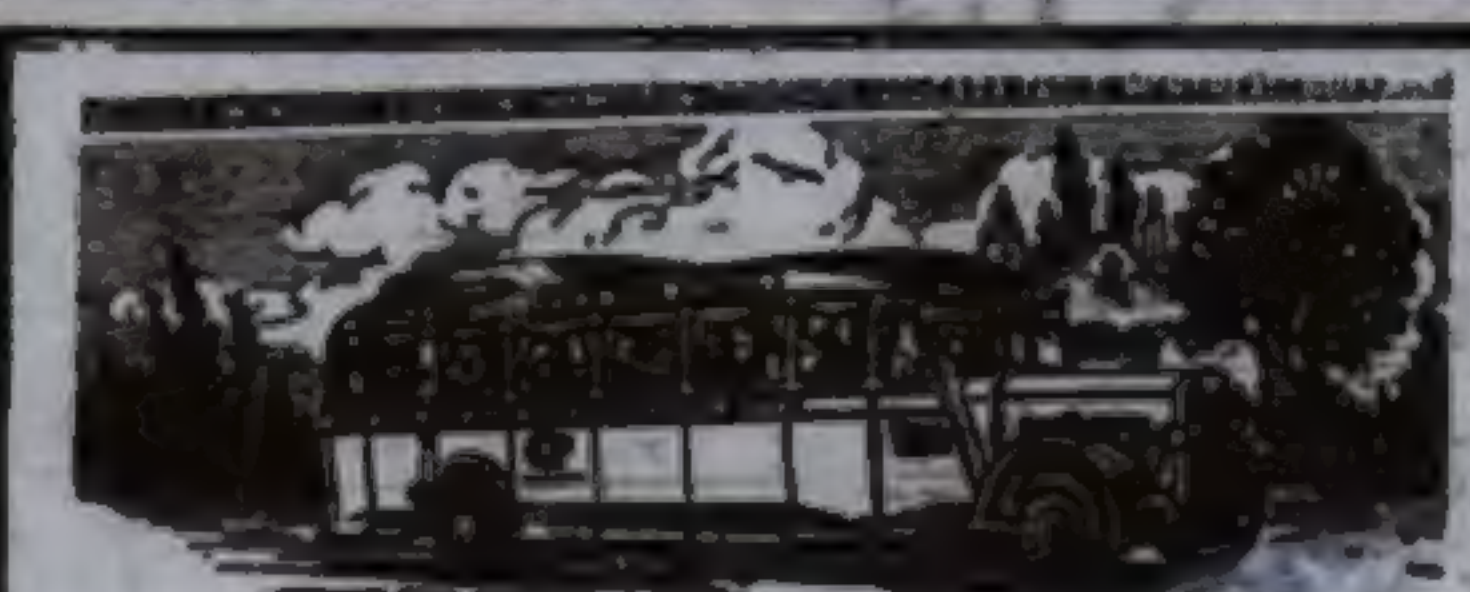

A ferry plying between Fort Erie, Ont., and Buffalo tore off part of the superstructure when an ice jam carried the vessel against the International Railway Bridge at Fort Erie, last week, but was able to gain the safety of the New York State Barge Canal, two miles down stream.

The ferry, a double-decked craft, carried passengers and automobiles. Heavy ice seen drifting down from Lake Erie after high winds raised the vessel as it crossed the Niagara River. The damaged vessel drifted from the bridge, after the collision and moved down stream, still in the grip of the ice.

HOME DESTROYED IN \$15,000 FIRE

The beautiful home of H. J. Reigh, located off the Lake Shore Road east of Port Weller, was totally destroyed by fire early Thursday morning, involving a loss estimated at \$15,000 covered by insurance.

The fire apparently started above the furnace, and from there spread rapidly throughout the fine brick structure. Mr. Reigh and the children, together with the nursemaid, were in the home at the time, Mrs. Reigh having remained with friends in the city overnight because of the blizzard. The occupants were able to escape with a few personal effects. A small quantity of furniture was also saved.

CANADIAN FILMS DURING 1935

Year-End Review—Canadian
Short Film Production A
Continued Success

Montreal. — Canada continued in 1935 to produce short sound films regularly which were shown widely in the Dominion's theatres and were very successful in other parts of the Empire. The showings of these Canadian featurettes on Canadian screens has been increasing steadily and satisfactorily for the past two seasons. The 1935 production program which includes two well-established series, the Canadian Cameramen and Canadian Sport Chats, is to be announced shortly.

These facts are included in a year-end summary from Mr. J. E. Norrish, managing director of Associated Screen Studios. The growth in popularity of these Canadian-made films on Canadian subjects has been gradual but most definite. There is now, judging by the bookings, a definite public demand and a definite audience for each succeeding release.

The films themselves have also developed considerably since the first featurettes were produced by Associated Screen Studios several years ago. They have come a considerable distance from the straight scenic, which really marked the beginning of actual Canadian film production for entertainment purposes.

Outstanding among the 1935 featurettes was "Hot and Happy", a one-reel whirlwind of all-Canadian action. It had flashes of a fighting 200-pound tuna battling with a fisherman in the North Atlantic, a 60-foot dive into the boiling waters of a waterfall as well as a close-up of the country's championship horse-shoe pitcher at the peak of his form, "Acadian Spring Song", of an entirely different type, was a love story set among Annapolis apple blossoms with a distinctive musical score by Howard Fogg. It was just as successful on the Pacific coast as on the Atlantic coast where it was made.

One Canadian film subject has now blossomed out as an annual release and one Canadian film has become a perennial success. A Canadian Cameramen called "Did You Know That?", released in 1934, was an entertaining melange of pictorial and geographical oddities from here and there all over the Dominion. Its immediate success led to a 1935 sequel and the sequel, in a way, makes it look as if it

Canada, an Integral Part of the Empire, —Mourns Loss of Her King—

Heart-Weakness Fatal To 71-Year-Old Sovereign —
Prince Ascends Throne — Empire Flung Into
Mourning — Entire World Pays Respect.

HIS MAJESTY, THE KING

Sandringham, Norfolk, England, (Tuesday, Jan. 21). — George VI, By the Grace of God, King of the United Kingdom of Great Britain and Ireland, and the British Dominions Beyond the Seas, Defender of Faith, and

"Your Majesty," he said, "your father is dead." With the last heartbeat of George V, Edward, Prince of Wales, became King, although the official proclamation does not take place until tomorrow.

At 11:55 p.m. on the 25th year, 8th month, 14th day and 24th hour of his reign. Death occurred at 11:55 p.m.

Shortly before midnight his physicians observed that the King's gallant fight against bronchial catarrh and a weakening heart had ended and that the Sovereign was about to die. They summoned to the bedside Queen Mary, the Prince of Wales and other members of the Royal Family from an adjoining room. Death came peacefully a few moments later.

The Queen was crying softly. She held the King's hand and listened to his final, labored breathing.

She broke down as His Majesty died but quickly rallied and kissed the monarch's forehead, now still in death.

Lord Dawson of Penn, the king's physician since 1907, solemnly announced the King's death, addressing himself to the Prince of Wales.

PRINCE EDWARD MOURNS
The Prince of Wales will assume the title of King Edward VIII, it is indicated.

He thus signed a message he sent the Lord Mayor of London shortly after his father's death.

MESSAGE TO LORD MAYOR
The new monarch sent this message to the Lord Mayor:

"I am deeply grieved to inform you that my beloved father, the King, passed away peacefully at 11:55 to-night."

(Signed) Edward.

Immediately upon the death of King George V, the Prince of Wales automatically succeeded to the Crown, which is the legal link between the people of the British Empire.

Ever since the days of Henry VIII the cry "The King is dead, long live the King" has signified there is no interregnum.

The new king is the first bachelor to succeed to the throne since William IV.

LONG LIVE KING EDWARD THE EIGHTH

Long Live The King

"The King is dead! Long live the King!" And so Edward VIII enters on the reign which will have all the world for an audience and posterity for its critic.

For his task as great and solemn as can come to any human, he has had years of training. When King George ascended the throne he was 64, Lord Marley, writing of the Parliament Hill of that day, said "the situation forced the abdication of the young king and his dangerous position."

He thus signed a message he sent the Lord Mayor of London shortly after his father's death. The new monarch sent this message to the Lord Mayor: "I am deeply grieved to inform you that my beloved father, the King, passed away peacefully at 11:55 to-night."

Immediately upon the death of King George V, the Prince of Wales automatically succeeded to the Crown, which is the legal link between the people of the British Empire.

Ever since the days of Henry VIII the cry "The King is dead, long live the King" has signified there is no interregnum.

The new king is the first bachelor to succeed to the throne since William IV.

"Streamline" Means Absence Of Non- Essentials In Dress

Chicago. — Now it's the "streamline" girl of 1936 and the "streamline" motor.

The holders of the titles are Mrs. Helen Bell, daughter of the Laird of Balmullo, Scotland, and Mrs. James G. Galt, daughter-in-law of George F. Galt, treasurer of the Republican National Committee.

They were chosen from scores of annually dressed women attending the annual Kemmerer House benefit ball by Mrs. E. A. Hughes Dunaway, creator of new efforts in modern art, and Walter Frazier, architect.

The judges' definition of "streamline" was "simplification of everything, absence of non-essentials in dress and good carriage."

Advertising Did It

A story from New York is to the effect that Mrs. Gloria Morgan Vanderbilt has opened a dress shop in the metropolis and is now regarded as one of the most successful business women in the city.

It is not difficult to discover the reason for Mrs. Vanderbilt's sudden rise to prominence in business. Only a few months ago the newspapers were filled with reports of her fight against losing the guardianship of her little daughter when relatives decided to take away from her. As a result, she became a familiar personality to millions of people. She lost the court battle but the publicity has been worth thousands of dollars in advertising and Mrs. Vanderbilt was astute enough to capitalize this advantage immediately.

It is a hint to those in business not to forget the life-blood of trade, which is advertising.—Wendell Tripp.

"I think that, given the climate, people will become more and more expert in the effective use of leisure."—Henry Ford.

"The world has exchanged the sweet fragrance of hay for the stench of gasoline and the deadly monoxide."—Harold Bell Wright.

If you are following potatoes with grain, seeded with alfalfa, apply 10 to 15 tons ground limestone per acre immediately after the potatoes have been lifted. This will sweeten the soil for alfalfa or other legumes in 1937.

Time For Pitiless Realism

When a leading newspaper of a large city announced, a few weeks ago, that four of its residents were to be killed outright before New Year's Day, readers were shocked at their complacency to read further. They discovered that the four citizens "marked for death" were to meet their end in a horrible form on the highway.

The news writer had been on the "beat" that included the morgue. He was shocked by what he had seen. He had visited hospitals, and had witnessed the slow suffering of the maimed. He had been to the homes of victims, had heard piteous tales of children left without a father or mother, or compelled to look after themselves as well as the injured member of the family. The reporter wrote simply, but factually. He predicted from the statistics of what had happened that four more persons were to be killed in motor accidents—and he guessed with deadly accuracy.

"Safety First" has been drilled into the public ear so long that it has lost much of the effectiveness it once had. But stories of almost revolting realism, such as "And Sudden Death" which appeared originally in "Readers Digest", short circuit the route between comprehension and action. Scaring people to make them drive safely is justified by a mounting accident toll wherever automobiles are known. In the United States, for example, more persons lost their lives on highways in the past 24 months than were killed in battle during the similar period when that country was engaged in the World War.

A suggestion to the civic, service, and women's clubs: Why not a cold-blooded program, "Accident Prevention in Our Community," with the doctor, the undertaker, and chief of police telling what they know of the subject in realistic word pictures drawn from their own experience? From an editorial in the Rotarian Magazine.

GET GOOD PRICES IN U.S. MARKETS FOR ONTARIO PIGS

WINNIPEG — Ontario-raised hogs are being poured into Michigan almost as rapidly as they can be transported and farmers of Essex and Kent counties from which the bulk of the shipments are made are reaping a golden harvest.

Figures released here recently disclose that for the first time since the Republican protective tariff went into effect eight years ago Canadian farmers are finding it profitable to truck their hogs across the border, pay the duty and unload them on the Detroit parking houses at paroled or higher prices than obtained in the regular hog market.

Two thousand three hundred Essex County hogs weighing more than half a million pounds on the hoof have been trucked across the river here since September 16 when the influx began. In November alone 1,400 head weighing 334,700 pounds were trucked across the river and sold to packers there. For these at one time the duty of two cents a pound was paid, the Ontario hog exporters received prices ranging from \$2.25 to \$2.50 per hundredweight above what they would receive if sold in the Ontario market.

A statistical table prepared from manifest sheets in the Detroit Customs office shows the speed with which the Canadian hog shippers hurried their wares across the Ambassador Bridge. During September total exports were 335 hogs weighing 116,322 pounds. These came from Tilbury, Altonville, Raby Mills, Harrow and Dresden.

In October 215 head were more, while in November a total of 1,169 hogs were sent across the river. The total weight was 334,700 pounds. In December to date shipments totalled 24,000 pounds. The grand total to date since September 16th is given as \$22,000 pounds. The largest shipment came from Tilbury, with Essex, Chatham, Dresden, Altonville and other towns contributing their quota.

Writer Deplores Lack Of Traditional Indian Handicrafts

SASKATOON—Few that unless help and encouragement was given Indians in northern reserves many of the characteristic handicrafts of the natives of this Dominion would disappear. Mrs. Munday, author of "A Mounty's Wife," Mrs. Munday spent several years in the Châteaufort district and last fall visited many of the Indian tribes in Saskatchewan.

Mrs. Munday believes the Government and mission schools do not take sufficient interest in traditional Indian art and thinks for too much poor imitation work is being turned out to accommodate the tourist trade.

Secrets of the leather and birch-bark work are handed down from generation to generation. Mrs. Munday said, but little effort is being made by the Government or by missionaries throughout the northland to encourage high grade work or to create a proper market for this original handicraft. Rather, it seems, the emphasis is on production.

Ishbel MacDonald Has Full Time Job On Her Hands

HIGH WYCOMBE, England — Ishbel MacDonald, daughter of Ramsay MacDonald, former Prime Minister, is finding her job—that of running an English inn—a full time one.

She had a busy day recently at the Flow Inn near High Wycombe, of which she has become the owner. A crowd of cyclists, motorists and others invaded the inn and the stock of beer was soon running low.

Mrs. MacDonald, who formerly was hostess at No. 10 Downing street, was kept busy serving lunches and drinks to the customers. Week-end visitors to the inn included the United States Ambassador, Robert W. Hargham, and his wife.

Unusual Post Made By 30 Scientists

Toronto.—In the distant future a medical paper will be published by an old scientist in which he will give the cause of the death of 29 of his colleagues.

Dr. C. H. Best, professor of physiology in the University of Toronto, revealed the strange post in the course of a short speech at the week-end.

Thirty research workers in the school of hygiene and physiology, physical examination. The examine each other and from each other they draw blood which is chemically analyzed.

"The idea is," Dr. Best said, "that the survivor will write a paper on what caused the death of the others."

CENT A MINUTE

COMPANIES pay out to agents for the sale of their products. The agent is paid a commission on the sale of the product. The agent is paid a commission on the sale of the product.

Another Canadian short of film action was also a noteworthy success, "Kingdom for a Horse" which had Old Dobbin in person as a commentator and covered Canada's equine celebrities from stamper bronchos to firehorses.

Indicating very real Canadian interest in Canada's capital "Westminster of the West", an unusual featurette with Ottawa as its setting, is now in its second successful season. The musical accompaniment includes the sound of the famed Carillon in the Peace Tower.

"The Game is Up" just released, takes the theatre-goer up among the mountain peaks with Canada's alpinists; "Distant Cousins" gave intimate glimpses of the Maori in New Zealand; and "City of Towers" is a featurette with Toronto's skyline as its background.

An interesting development during the year was the popularity of "fact films", detailed pictorial reports on subjects of wide public interest. Dr. Locke of Williamsburg was the central figure in a film of this type and gold mining in the Rockies, the theme of another. This technique, Mr. Norrish comments, is being used extensively in educational and instructional films.

Poor Deeds They Just Mustn't Be Annoyed

Burlington, Ont. — You will be safe in Burlington this leap year.

Said Chief Constable L. J. Smith recently.

"If any male citizen complains of being made an offer of marriage and, instead of being highly flattered, feels that he is the victim of a conspiracy, public nuisance, or threat; then, if the case is substantiated, no police officer could refuse to give such protection as the law may provide. Man's most prized prerogative, that of proposing, should be safeguarded — leap year or no leap year."

"There is nothing in the world that, in human hands, does not lend itself to abuse."—Mahatma Gandhi.

"Men and nations are saved by good-will, not by political machinery."—Dean Inge.

Farmer Problems

Conducted by Professor Henry G. Bell

with the co-operation of the various departments of
Ontario Agricultural College.

The business of farming is yearly becoming more and more dependent upon facts that have been gathered through livestock and livestock management, crop production, soil management, disease and insect control and business organization of the farming industry.

Individual problems involving one or more of these, and many other phases of agriculture, engage the attention of Ontario farmers from day to day. During the winter months there is a little more time for study of the most acute problems.

Through this column farmers may secure the latest information pertaining to their difficulties. To introduce this service Professor Bell has prepared the following typical problems to indicate the information which should be given in order that a satisfactory answer can be made.

If answer is desired by letter enclosed stamped and addressed envelope for Professor Henry G. Bell, Room 517, 75 Adelaide St. W., Toronto, Ontario.

Question: W. J. C.—(a) What should the protein content of the concentrate mixture fed to dairy cattle be?

(b) What protein-rich supplemental feeds may be used in the ration for the producing cow?

We are supplying milk to Toronto market.

We have on hand: Timothy and

alfalfa on the lower part is getting this. I haven't much manure for this field. I want to grow potatoes on the whole field this year. What treatment would you advise?

Answer: It would appear from your description that the land had been pretty well removed, especially from the light soil of the upper part of the field. We would advise you to have soil from the entire field tested for acidity. A three-ton crop of alfalfa removes about 200 lbs. of lime and 134 lbs. of potash to the acre. It may be that the soil on the lower part is becoming too acid for best alfalfa, too.

As a general rule, it is not best to plant potatoes on an alkaline soil nor is it best to plant alfalfa on a soil in preparation for potatoes. Bright acidity of soil is favorable to potato growing since potato roots and other diseases do not thrive in acid soils.

Your soil, especially those of the lower part of the field will be fairly well supplied with organic matter or plant refuse, and the lower soil should have a fair supply of nitrogen. We would advise you to apply 600 to 750 lbs. per acre of 24-24 fertilizer for potatoes. It looks through the soil for 4-5-10 to be the best analysis of fertilizers for potatoes. If possible, put on the potato fertilizer with a combined potash and fertilizer planter so that the fertilizer will not fall on the potato piece or will the potato piece rest immediately on the fertilizer.

Question: R. P.—I have a well-drained field for 1800 potatoes about which I wish information.

The higher part of the field is a light sandy loam, but the lower part is heavier and seems to hold the moisture better. I haven't been able to get a stand of alfalfa on the upper part for three years. The al-

'SALADA' TEA

is delicious

THE REMARKABLE ROMANCE OF AN INDUSTRIAL DICTATOR

Velvet and Steel

By PEARL BELLAIRS

Joan thinks of humble origins in the industrial world. She is the daughter of a millwright, and her father, who is a millionaire, has been forced to sell his share of the company to her. She is now a social equal of the aristocracy, and she is determined to make the most of her position.

"Now, dear," he said, "I have a great deal to tell you. I have been thinking about you a great deal, and I have decided to tell you the truth. I have been in love with you for a long time, and I have decided to tell you so."

CHAPTER XVI

SUMMONS FROM HANSEN

A day or two passed. Mr. Denby wanted to know why Joan Hansen had not been down to Hendry Street. A week passed and then a fortnight, and Mr. Denby began to demand to know where their benefactor had gone to.

"I hadn't seen him at the Works," Mr. Denby said. "He was supposed to be here, but he wasn't."

But Joan said nothing, and it was Maude, who was very present about the trouble which her lie to Al had caused, who burst out with the story.

"It's all that fool Al's fault!" cried Maude.

She had not seen Al Broome, but she knew, so far as Al and Hansen were concerned, that he had been related to her. Joan, Mr. Denby was furious, looking suspiciously at Joan.

But Joan said nothing, and it was Maude, who was very present about the trouble which her lie to Al had caused, who burst out with the story.

"It's all that fool Al's fault!" cried Maude.

King George The Fifth

(Died Jan. 20, 1936)

The King is dead, gone to eternal rest. The Empire's last a noble friend indeed.

Regardless of his people's claim of creed: He loved them all; their welfare was his quest.

His noble heartedness was manifest. He had no brief for selfishness, nor greed. Nor did he ever fail to show the lead

In state affairs for that which was the best. For twenty-five hard years he graced the throne

Of England with great fortitude and zeal. At all times in his heart the Empire's weal.

And now the Empire mourns, but not alone. A stricken world feels, too, the painful sting.

The King is dead. God bless our noble King. JOHN W. LEWTHWAITE.

More Spent On Faces Than On Character

TORONTO.—The "building-up" of a face, by purchase of cosmetics, is six times as important to "American" generally than the "building-up" of a character through education.

Dr. W. E. Hines, director of the St. George School for Child Study, declared here recently. He noted further that eight times as much money was spent on cosmetics and 12 times as much on education, as on education.

Dr. Hines noted that, although the whole future enjoyment of life of the individual depends upon the training of youth, such expenditure is constant. In the most formative years of development from birth to five years of age, nothing at all is spent on education.

"Question if the child of to-day will ever become an adult in the true meaning of the word under our present educational system," he said. "Education to-day is directed to the wrong end of life. There isn't one of us who will not admit that to-day we send our children to school for the sole purpose of their financial gain."

The true education doesn't educate the child with the end in view of developing his ability to make money, but to develop his ability to enjoy life, he said.

Baby Has Six Little Fingers and Six Tiny Toes

President Arturo Alessandri of Chile will be godfather to Arturo Ramirez, the 17th child of a poor couple in Antofagasta.

The baby was born with six fingers on each hand and six toes on each foot, and all his 16 brothers and sisters were born with the same malformation.

Dowsers and Forked Twigs Detect Water From Maps

(From the Hamilton Spectator)

What is known as water divining or "dowsing," in other parts of the world, is known as "witching" to the good people who live along the shores of Lake Erie.

Scientists may look down the nose at water divining or turn their useful appendages away from any suggestion that there may be something in this method of locating water below the earth's surface, but in Hamilton county they take "witching" for granted.

No one up there would be digging a well without first "witching" one or more of the best known "water witchers." Long experience has convinced them that the supplies are "all wet."

They have societies of dowsers in England and Europe, and some remarkable statements are made before these bodies, which out of deference to the scientist we refrain from describing as "learned." The most astonishing assertion made before a meeting of one of these bodies, a statement which strained our credulity to breaking point, is that some dowsers did not require to go over the ground with their forked twig.

They could detect underground streams miles away from their location by a ring suspended to a thread over an ordinary map.

It is reported that the British Columbia government surveyed out all the mineral areas in the province by this method. They employed a body of natural powers to go over their maps in the government house.

So that as it may, the vicinity with which water is found by a good dowsing is something not to be laughed away. We have seen the back of a hairborne twig turn off in the firm grip of a "water witch" as the twig turned toward the quack; witnessed a dried twig snap in two at a distance from the hands. One dowsing avowed that he could judge

Skin Turns Blue

Silver Solutions to Cure Colds Responsible For Discoloration

Ten little American girls and five little boys have within the last year turned blue. They have developed agryria, a rare discoloration of the skin resulting, in these 15 cases, from the use of solutions containing silver brought to cure colds.

Medical circles in the United States are alarmed at a sudden increase in this hideous rare complaint. Scarcely cured have been recently reported.

During the last five years the grand total of agryria sufferers has been more than doubled.

According to medical authorities, the discoloration of the skin is permanent. On present use, treatment for the condition is known.

The human body can retain only so much silver. If more than the equivalent of seven grains of silver are absorbed, the body is poisoned.

Shiny-blue blotches first appear on the face, hands, and the half-moons of the finger-nails as the result of the silver in the system being chemically acted upon by light.

In chronic cases the whole body is affected and a good silver-black color.

"SILVER WIRE" HAIR

Beyond the unpleasant discoloration of the skin the affected persons are apparently quite healthy and normal to every way.

In England cases of agryria are extremely rare. Beyond a few persons who have contracted it from some occupational cause, such as the handling of silver preparations over many years, it is almost unheard of.

An authority consulted in London said he had seen only three cases in all but one case only the backs of the hands were affected.

The other case, he said, was outstanding. An elderly woman had for 20 years on the advice of a quack, been taking pills of silver nitrate to cure her indigestion.

She became so afflicted with agryria that her face was the color of a photographic negative. The silver in her system had affected her hair, turning it almost into silver wires.

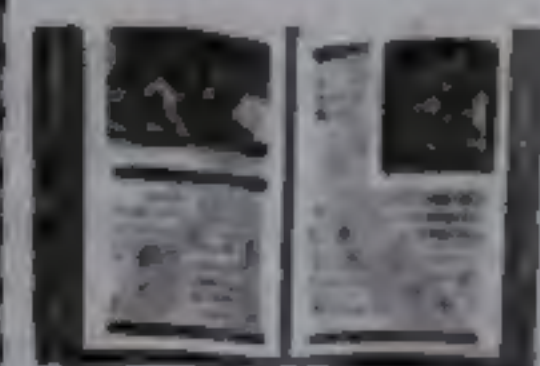

Medical doctors say there have been several cases of this in the city but although the skin remains discolored, there are no bad effects otherwise.

Bridegroom Bit His Nails—He Would!

FOND DU LAC, Wis.—County Clerk A. J. Krumm gave the first 1936 bride who proved she "topped the question" a free marriage license, just like he said he would.

The bride, Rosella Kruglik, blushed and said she had asked Lester E. Engler to marry her.

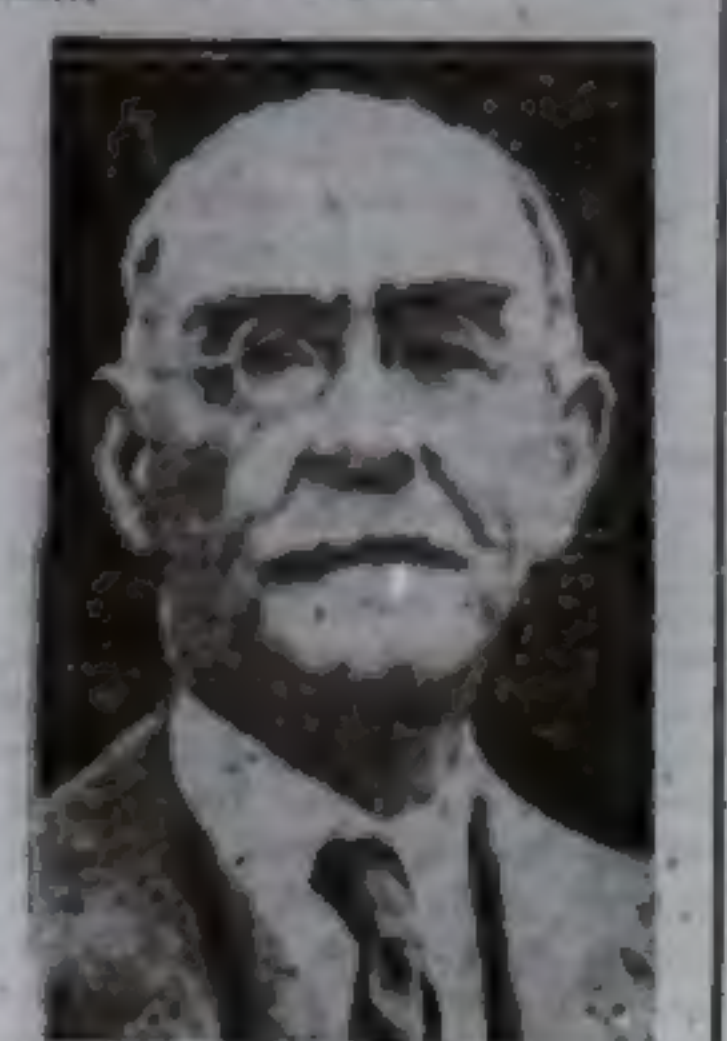

Asked whether Miss Kruglik had proposed the marriage the bridegroom bit his finger nails nervously and said he guessed there wasn't any sense in talking about that.

The Book Shelf

BY MAIR M. MORGAN

The Empire is plunged in mourning by the death of our beloved sovereign, King George V. The world of literature, too, has lost its greatest creative literary genius of modern times, Rudyard Kipling.

Rudyard Kipling

Kipling, with that true genius of the born writer, seized the material of his life, and transformed it into a masterpiece of literature. His writings traced the log of his roaming, varied life over the Seven Seas. "Plain Tales From the Hills," "Partnership Ditties," and other early works recorded his life with the British in India after he came back to India (then was born in Bombay) from school in England. "It" that poem which stirred the hearts of all when it first appeared in print will go down to posterity, keeping the Poet of Empire's name forever alive.

If you can dream—and not make dreams your masters; If you can think—and not make thoughts your aim; If you can meet with Triumph and Disaster

And treat those two imposters just the same; If you can bear to hear the truth you've spoken

Twisted by knaves to make a trap for fools; Or watch the things you gave your life to broken

Or steep and build 'em up with worn-out tools; If you can talk with crowds and keep your virtue

Or walk with Kings—lose the common touch; If neither fame nor loving friends can hurt you

If all men count with you, but none too much; If you can fill the unforgiving minute

With sixty seconds' worth of distraction run; Yours is the Earth and everything that's in it, And—which is more—you'll be a Man, my son!

Kipling lived for some time in the United States, where he married an American girl, Miss Caroline Starr Balestier, in 1902. They settled in Brattleboro, Vt., where two of their three children were born. In 1906 the Kiplings left America to winter in South Africa and then decided to make their permanent home in England.

It was while in the United States that he wrote "Our Lady of the Snows," which this time Canadiana has reprinted, but it has been this poem also given voice to a charter of "autonomy" "Daughter in

FROM GIRL TO WOMAN

GROWING girls are often suffering from female irregularities, catarrhs, drains, etc. Pierce's Favorite Prescription is the vegetable tonic to give your daughter at such times. Hear what Mrs. Wm. C. Cole of Hamilton, Ont., has to say: "When I was a young girl, I suffered from female irregularities, catarrhs, drains, etc. I was very weak and pale. I was told to take Pierce's Favorite Prescription, and I did so. I am now a strong, healthy woman, and I can give my daughter the best of advice."

Write for particulars of this wonderful medicine to The Institute of Practical and Applied Psychology, 210 Confederation Building, MONTREAL, QUEBEC.

VIGNETTE STORY CONTEST

Picture a year's life or the lives of your friends there are striking human pictures which may suggest a story that can be told with clarity and interest. Write a vignette story, not more than 200 words.

A constructive criticism on each story submitted is given. A suggested outline for a vignette story is given. Each entrant must send in the name and address, and number of words in the story. Enclose return postage. Vignettes if possible or even legible handwriting in ink accepted.

Send your story in on or before February 15th, 1936, with an entry fee of twenty-five cents. The prize will be shared between those who send in a correct story, 15 per cent with one entry and 10 per cent for two entries. All entrants will receive a receipt by mail.

Army Throws Over Its Old Technique

(From the London Times)

The changes outlined in the War Office announcement are the first really large step in Army reorganization since the War, while also in a technical sense the most definite change that has taken place in the history of the British Army.

The reorganization now announced is an attempt to reconcile the lessons of the War with the present stage of technical progress and with the clearest indications of the trend of development now available. Although the decision has only just been taken, the general outlines of the reorganization were expounded a year ago. Since then experimental tests have helped to provide data on the problem, and by the end of this summer's training had proved sufficiently satisfactory to clarify the issue.

The final scheme shows certain modifications and developments of that originally outlined.

The new mechanized mobile division will have two mechanized cavalry brigades instead of one in addition to the Tank Brigade. No horse cavalry brigade will remain. Each mechanized cavalry brigade will have an armored cavalry regiment, and will comprise two motor cavalry regiments instead of three.

The mechanization of the cavalry, which has been another great step, will justify the ground conditions there.

This mechanization of the cavalry has been decided upon in preference to their reduction and the extension of the Royal Tank Corps. It is a rather hard on the war arm, which has borne the burden of developing the means and methods of mechanization, but it is a necessary step.

The other big change, the reorganization of the infantry, conforms closely to what was foreseen. If this year's tests with the 4th Infantry Brigade have brought to light difficulties—especially the need for a higher standard of training and of the balance of advantage. It is an incomplete beginning to the work of the new Secretary of State for the Army, and a notable ending to the term of the Chief of the Imperial General Staff.

The creation of a smaller and handier division is a necessary step if there is to be any prospect of future operations avoiding exhaustion under the mere weight of the formations employed. All in all, the thoroughness of the reorganization now decided upon is a matter of which the responsible authorities must be congratulated. It is an incomplete beginning to the work of the new Secretary of State for the Army, and a notable ending to the term of the Chief of the Imperial General Staff.
